

Mohammed Salih C K

Data Scientist

Kochi | +91 7736596093 | msalihck01@gmail.com | LinkedIn | GitHub

PROFILE

Passionate AI and Machine Learning Engineer with hands-on experience in developing and implementing multiple real-world projects using Python, SQL, Machine Learning, Deep Learning, and Generative AI. Skilled in building intelligent systems, predictive models, and AI-driven applications that solve practical problems. Strong ability to transform complex data into meaningful insights and innovative solutions.

SKILLS

Technical Skills

- **Programming Languages** : Python, SQL, HTML, CSS.
- **Frameworks & Libraries** : Scikit-learn, TensorFlow, Keras, OpenCV, Flask
- **Machine Learning** : Supervised Learning, KNN, Naive Bayes, Logistic Regression, SVM, Decision Tree, Random Forest, Linear Regression, Unsupervised Learning, K-Means Clustering.
- **Deep Learning** : ANN, CNN, Transfer Learning, RNN, LSTM, OCR, YOLO, LLM, Gen AI, Agentic AI.
- **Data Science & Analytics** : Exploratory Data Analysis (EDA), NumPy, Pandas, Matplotlib, Seaborn, Power BI.
- **Version Control** : GitHub

Soft Skills

- Analytical Thinking, Problem-solving, Communication Skills, Teamwork, Active Listening.

EXPERIENCE

Data Science Intern, Luminar Technolab

11/2025 – Present | Kochi, Kerala

- Developed predictive models using Machine Learning and Deep Learning techniques to solve the data challenges.
- Leveraged Power BI to create interactive dashboards, providing data-driven insights for business decision-making.
- Performed extensive Exploratory Data Analysis (EDA) and data cleaning on diverse datasets using Pandas and NumPy.

Freelance Software Developer, Freelance

08/2025 – 10/2025 | Remote

- Developed and deployed a responsive billing system using Python and Flask with SQLite for secure data management.
- Designed a web interface to manage products, invoices, and payments, optimizing backend queries for performance.
- Integrated WhatsApp API to streamline client communication and automated invoice generation features.

PROJECTS

Network Attack Prediction System , Python, Scikit-learn, Pandas, NumPy, Streamlit, Random Forest

05/2026 – 06/2026

- Developed a network intrusion detection system using Machine Learning and the UNSW-NB15 dataset.
- Trained a Random Forest model with 95.33% accuracy and 98.13% recall through data preprocessing and feature engineering.
- Developed a Streamlit application for real-time network attack prediction and monitoring.

AI-Based Barrier-Free Toll Collection System

05/2026 – 06/2026

Python, Flask, OpenCV, YOLOv11, Tesseract OCR, SQLite, HTML/CSS, Telegram Bot API

- Developed an AI-powered toll collection system using YOLOv11 for vehicle and license plate detection.
- Integrated Tesseract OCR for license plate recognition, database verification, automated toll deduction, and transaction logging.
- Built a Flask-based web application with live video processing and real-time Telegram notifications.

EDUCATION

Master of Computer Applications (MCA), College Of Engineering Cherthala (KTU)

2023 – 2025 | Cherthala, Kerala

CGPA: 7.66/10

Bachelor of Computer Applications (BCA)

2020 – 2023 | Edakochi, Kerala

Siena College Of Professional Studies (MG University)

CGPA: 6.8/10
